waterfowl and other birds**

Contains a source of live (viable), naturally occurring microorganisms.

GUARANTEED ANALYSIS:

Bacillus subtilis.....7x10⁶ CFU/gm
Lactobacillus acidophilus.....3x10⁶ CFU/gm
Pediococcus acidilactici.....2x10⁴ CFU/gm
Pediococcus pentosaceus.....2x10⁴ CFU/gm
Saccharomyces cerevisiae.....1x10⁶ CFU/gm

INGREDIENTS:

Rice flour, Soybean meal, Dried *Bacillus subtilis* fermentation product, Dried *Lactobacillus acidophilus* fermentation product, Dried *Pediococcus acidilactici* fermentation product, Dried *Pediococcus pentosaceus* fermentation product, Dried *Saccharomyces cerevisiae* fermentation product, Salt.

DIRECTIONS: For best results, incorporate Gro-2-Max into either drinking water (recommended) or feed every 1-3 days.

Drinking water: Gro-2-Max may be mixed with water at 1½ teaspoons (3.5 gm) per gallon or 2½ tablespoons (17.5 gm) per 5-gallon tank. Mix Gro-2-Max portion with drinking water and add to waterer or tank. (It is recommended that Gro-2-Max be poured into a tea filter or mesh pouch when using systems with drip dispensers to avoid clogging the spout.)

Feed mixture: Mix the equivalent of one teaspoon Gro-2-Max (2.5 gm) to each 5 lbs. of feed. For best results with larger amounts of feed, first mix Gro-2-Max with a small amount of feed, then mix evenly with the remaining feed for optimal distribution.

STORAGE: Keep in a dry area, out of direct sunlight and humidity, between 33° and 103°F. To maintain effectiveness beyond three weeks of opening, transfer contents to resealable container.
