

TESTIMONIALS 2014

"I have been using Gro2Max on all of the chicks I've hatched this year, probably around 300 thus far. I usually lost about 10% of hatched chicks by the 7th to 10th day, and I have noticed a significantly less loss this year of only about 2%. I have been just thrilled with this improvement! The oldest chicks are now nearing point of lay, and again, I usually lose another 5% right around this time, but I am seeing nothing amiss at all in the layers yet. I suspect that I may not lose any this year, which is fantastic! While I do not coddle my birds, the addition of the probiotics seemed like a natural one to me. I was a bit skeptical at first, but I have changed nothing in my regimen other than adding Gro2Max, so I am quite sure that the added robustness in the chicks I'm seeing this year is due to your product."

Wynette Adamson, Adamson Acres, Swartz Creek, MI

"My hens are looking so much better and their eggs are larger and production has increased. I will be ordering more soon." *Melinda Schneider, St. Petersburg, FL*

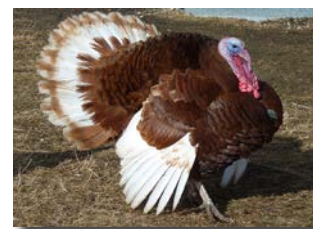

"I recommend this product. My girls are loving it. I will definitely buy it again. I recently had one egg that weighed 2.62. And quite a few @ 2.50 ounces." *Donna Authement, Spencer, TN*

"We were getting 45-48 eggs a day, since then we have increased to 53-60 eggs daily. The chicks given this product have nice plumage and have filled out nicely. We have really enjoyed introducing this product into our feeding program." *Mickey & Leslie Baxter, Mesick, MI*

"I bought this Gro2Max for my hen with vent gleet. She needed extra probiotics in her system and this was a safe effective way for her to get them. I just added some to her water. Easy! 2 weeks later she started to lay eggs again after a 3 month sabbatical. I definitely recommend this product! This is also great to use following worming." *Katie Milhorn, Worley, ID*

"The Gro2Max and Farm 360 have surpassed our expectations. The birds are healthier, more active and egg production has increased with the Gro2Max." *Jason Houghton & Jamey Haugh, H&H Poultry, Dover, PA*

"Thanks for giving us the opportunity to try out your product. It really does work good, we think our chick mortality rate has been cut in half!" *Larry & Angie McEwen, Chicken Scratch Poultry, McLeansboro, IL*

"Thank you for the Gro-2-Max for the chickens that I got at the Poultry Convention in St. Paul this year. The chickens did the best ever as you can see from the enclosed pictures. In 7 weeks, they averaged over 7 lbs. live dressed (with no water hydration for cooling). We had a chicken that weighed 8.65 lbs. and the breast was 3.61 lbs.! We started them off on a 21% ration for 3 weeks and then switched to a 19% ration to finish them."

Mark Borchers, Borchers Farms, Holstein, IA
